ANMOL KUMAR

■ Mohali, Punjab 160071 ■ 8054205658 ■ anmol.ios58@gmail.com ■

SUMMARY

IOS Developer with 2+ years of experience designing, developing, and maintaining production-grade iOS applications. Skilled in Swift, SwiftUI, Objective-C, UIKit, IoT integrations, Bluetooth communication, REST APIs, and scalable mobile application development. Experienced in MVC and MVVM architectures, performance optimization, and cross-platform development using Flutter and Dart. Proficient in using AI-assisted development tools for debugging, refactoring, and productivity enhancement while maintaining high code quality and user-focused solutions.

EDUCATION

Master's of Computer Applications : **Expected in 07/2027**
Lovely Professional University
Pursuing with Full-Time Employment

Bachelor of Computer Applications : **08/2024**
Swami Vivekanand Institute of Engineering & Technology Banur - Banur, Punjab, India
GPA: 7.57

SKILLS

Languages: Swift, SwiftUI, Objective-C, Dart, Flutter

Frameworks & Technologies: UIKit, SwiftUI, Core Data, Core Graphics, Core Location, AVFoundation, MapKit, Combine, Flutter SDK, Firebase, UserNotifications, RESTful APIs, WebSockets, CocoaPods, Swift Package Manager (SPM), IoT Integrations

Apple Developer Ecosystem: Apple Developer Console, App Store Connect, TestFlight, Certificates & Provisioning Profiles, Push Notifications (APNs), In-App Purchases, App Signing & Deployment, App Store Submission & Release Management

Tools & Platforms: Xcode, Git, GitHub, SourceTree, Postman, Figma, Asana, CI/CD Pipelines, Firebase Crashlytics

Architecture & Development Practices: MVVM, Clean Architecture, Modular Architecture, MVC, Agile Development, Code Review, Performance Optimization, Unit Testing, UI Testing

AI-Assisted Development: Cursor, Claude, GitHub Copilot (AI-assisted coding, debugging, refactoring, feature prototyping, code migration, documentation generation)

PROFESSIONAL EXPERIENCE

IOS DEVELOPER 01/2024 to Current
C+A Global India, Mohali, Punjab, India

- iOS Developer with experience in building native mobile applications and integrating IoT devices using Swift and UIKit. Skilled in REST APIs, Bluetooth/Wi-Fi communication, real-time data handling, and performance optimization. Also experienced in cross-platform app development using Flutter to build responsive mobile applications for iOS and Android.

IOS TRAINEE 07/2023 to 12/2023
CS Soft Solutions Pvt. Ltd., Mohali, Punjab, India

- Assisted in mobile application development, debugging, testing, and API integration under senior developer guidance.
- Gained hands-on experience in iOS development workflows, UI implementation, and team collaboration.

PROJECTS

Projects Kodak Apps (Smile, Smile Classic 2-in-1, STEP Prints)

- Developed iOS apps integrated with Kodak instant printers via Bluetooth.
- Implemented printer connectivity, firmware updates, and lifecycle-aware printing workflows.
- Enhanced photo editing features (filters, text, blur, transform) and camera capture flow.
- Improved Bluetooth onboarding, permissions, notifications, and analytics integration.
- Fixed crashes, memory leaks, and App Store compliance issues for stable releases.

Zip Printer

- Built social sharing and multi-platform photo access features.
- Added filters, borders, panorama support, and optimized print preview workflow.

Mint Printer

- Developed photo editing features and improved print preview experience.
- Optimized UI performance and overall app responsiveness.

SnapTouch Camera

- Implemented print preview and photo adjustment before printing.
- Improved UI/UX for smooth editing, sharing, and printing workflows.

HP Sprocket App – Flutter Redesign (Ongoing)

- Rebuilding app using Flutter based on Figma designs.
- Integrating Flutter UI with native iOS Bluetooth printer functionality via platform channels.
- Handling Bluetooth device discovery, connection, and communication.
- Using AI-assisted tools for development, debugging, and architecture improvement.
